Product highlights

Digital Studio Picture Control

NTSC Playback

Turbo Drive

Follow TV

The video recorder or DVD recorder matches the stations and presets of your TV. Analogue: A signal comparison is made between TV and recorder via SCART cable. The user has to select every present available in his TV set. Digital: The re-sorting is done fully automatically.

Automatic long play recording

Turbo timer

Record Link

When you want to record a programme from your satellite receiver or any other external device just activate the "Record Link", put the set in standby and programme the desired timer on your satellite receiver. Upon activation of the satellite receiver, the set will start the recording simultaneously.

NICAM Digital Stereo

TV programs are broadcast with NICAM digital stereo sound. It offers CD-quality sound with a high immunity to noise and signal degradation. It can be used with mono, stereo and Dolby Pro Logic broadcasts. The integrated tuner of this product is fully equipped to decode the NICAM signal.
